1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ilya Zborovsky on 4/11/5.

The application has been amended as follows:

Claim 13 (Currently Amended) A control drive comprising:

a housing (5);
a driven wheel (30);
an electric motor (9) disposed in the housing and coupled with the driven wheel (30); and
a potentiometer (25) arranged in the housing (5) for determination of
a position of the driven wheel (30), wherein the potentiometer (25) is located
in a potentiometer housing (47), where the potentiometer housing (47) has
at least one detent tooth (51), wherein the housing (5) has at least one
detent projection (54), wherein the at least one detent projection (54) of the housing (5) in which
the potentiometer housing (47) is installed forms a detent toothing (57) with the at least one
detent tooth (51), wherein the detent toothing (57) or the detent tooth (51) is flexible enough to
allow relative rotation of the potentiometer housing (47) within the housing (5).

2. The following is an examiner's statement of reasons for allowance: Primarily for claim 13 the added limitation above is not disclosed or suggested in the claimed combination. For claim 25, primarily, the potentiometer housing being rotatable relative the housing when the

detent projection and the detent tooth form a detent toothing is not disclosed or suggested in the claimed combination. For claim 24 primarily, the at least one detent tooth arranged directly on and formed of one piece therewith, and wherein the at least one detent projection of the housing in which the potentiometer housing is installed is not disclosed or suggested. It is noted that the ordinary definition for detent is a pawl. Webster's II, New Riverside Dictionary 1994. Due to this definition, the Petrone et al. patent is not considered to disclose or suggest a detent tooth, detent projection and detent toothing as claimed, contrary to the earlier broader interpretation given.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl D. Easthom whose telephone number is (571) 272-1989. The examiner can normally be reached on M-Th, 5:30AM-4:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on (571) 272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
